

Dear reader,

You have one or more disability insurance(s) with Nationale-Nederlanden via your employer. We have some good news for you. From now on you can also view the WGA Hiaat insurance policy and/or the WIA Excedent insurance policy in MijnNN. We are pleased to tell you more in this email.

What is MijnNN?

MijnNN is a digital environment in which you can view your personal insurance policy or policies. From now on, the disability insurance(s) that you participate in via your employer can also be viewed in MijnNN. This means that you can access information about these policies securely and conveniently in one online location.

What information is available to view about the disability insurance(s) in MijnNN?

From now on, you can access more information about your insurance policy in MijnNN, where you can also find important policy documents. You will receive these documents in digital format only via MijnNN from now on and no longer by post. They include your annual Uniform Pension Statement that you receive from us. You also have the option of downloading the documents. In addition, MijnNN includes a WIA calculation tool which you can use to give you an insight into your financial situation if you become occupationally disabled.

Important documents are available digitally

Documents such as the annual Uniform Pension Statement or changes to the scheme that applies to you will be available digitally from now on. You can find the documents in MijnNN. You will be notified by email when a new document is added. If you would like to continue receiving information by post, you can specify this in your MijnNN environment, log in to your account first and after that click [here](#).

Do you have any questions?

If you have any questions about your occupational disability insurance policies, we would refer you to your employer. You can also reach us via email at inkomencollectief@nn.nl and we are happy to answer your questions.

Kind regards,

Igno Schings
Director, Inkomen Collectief
